Tkaniny Screen

do systemu Refleksol ZiiiP 120

SERGE 1% (SERGE 100) / SERGE 600

Kolekcja tkanin z włókna szklanego pokrytego PVC. Tkaniny z tej grupy mają charakterystyczny skośny splot typu „serge”, który gwarantuje im niezwykłą stabilność wymiarową. Wysoka odporność ogniowa oraz bardzo dobre parametry techniczne tkanin zapewniają użytkownikom komfort optyczny w pomieszczeniach, chroniąc tym samym przed nadmiernym nagrzewaniem się wnętrza.

WSPÓŁCZYNNIK OTWARCIA

Względna powierzchnia otworów tkaniny określana jest niezależnie od koloru. Dla tkanin z tym samym splotem współczynnik otwarcia powinno się mierzyć na podstawie najciemniejszego koloru w kolekcji
